In recent year, certificate for the exam has raised [CRT-251 Latest Test Braindumps](#) great popularity, since certificate may be directly related to the salary or your future development.

NEW QUESTION: 1 Welche der folgenden Ersetzungen sind in den Vereinfachungen von SAP S/4 HANA Sales enthalten?
A. SAP GTS ersetzt ERP Foreign Trade
B. SAP Revenue Accounting ersetzt ERP Revenue Recognition
C. Settlement Management ersetzt ERP-Rabatte
D. Order Fulfillment Management ersetzt SAP CRM
Answer: A,B,C

NEW QUESTION: 2

SysOps管理者には、AWSリソースのバージョンのメンテナンスを実行するAWS Lambda関数があります。この機能は毎晩実行する必要があります。

最も費用対効果の高いソリューションはどれですか。
A. 1つのt2.nano Amazon EC2インスタンスを起動し、Lambda関数を呼び出すためのLinux cronジョブを毎回同じように作成します。
B.

毎晩同じ時間にLambda関数を呼び出すためにOpsworksスタックにChefレシピを実装します。
C.

毎晩同じ時間にLambda関数を呼び出すようにAmazon

CloudWatchメトリクスアラームを設定します。
D.

毎晩同じ時間にLambda関数を呼び出すようにCloudWatchイベントをスケジュールします。

Answer: D
Explanation: Using AWS Lambda with Amazon CloudWatch Events You can create a Lambda function and direct AWS Lambda to execute it on a regular schedule. You can specify a fixed rate (for example, execute a Lambda function every hour or 15 minutes), or you can specify a Cron expression. For more information on expressions schedules, see Schedule Expressions Using Rate or Cron. This functionality is available when you create a Lambda function using the AWS Lambda console or the AWS CLI. To configure it using the AWS CLI, see Run an AWS Lambda Function on a Schedule Using the AWS CLI. The console provides CloudWatch Events as an event source. At the time of creating a Lambda function, you choose this event source and specify a time interval. If you have made any manual changes to the permissions on your function, you may need to reapply the scheduled event access to your function. You can do that by using the following CLI command.
`$ aws lambda add-permission --function-name function_name --action 'lambda:InvokeFunction' --principal events.amazonaws.com --statement-id 'statement_id' --source-arn arn:aws:events:region:account-id:rule/rule_name`
Each AWS account can have up to 100 unique event sources of the CloudWatch Events- Schedule source type. Each of these can be the event source for up to five Lambda functions. That is, you can have up to 500 Lambda functions that can be executing on a schedule in your AWS account. The console also provides a blueprint (lambda-canary) that uses the CloudWatch Events - Schedule source type. Using this blueprint,

you can create a sample Lambda function and test this feature. The example code that the blueprint provides checks for the presence of a specific webpage and specific text string on the webpage. If either the webpage or the text string is not found, the Lambda function throws an error.

NEW QUESTION: 3 The Sales Director at Cloud Kicks noticed that while Lead conversion rates were high, Opportunities were not moving through the sales cycle. many of the contacts that were converted had no phone, email, or background information captured. Which three solutions can be used to improve the quality of Leads being converted? Choose 3 answers **A.** Update web-to-lead forms to require input fields be completed prior to submission. **B.** Create a validation rule to check that necessary information is complete upon Lead conversion **C.** Review Lead conversion mapping to ensure necessary fields are mapped correctly. **D.** Schedule a report that notifies Lead owners daily of Leads with incomplete information. **E.** Implement a trigger that warns the user of incomplete information during Lead conversion. **F.** Mandate that all Lead data must be reviewed prior to being created in Salesforce. **Answer: A,C,E**

NEW QUESTION: 4 DA1というサーバーにDirectAccessを展開しています。
DA1はファイアウォールの内側に配置され、単一のネットワークアダプタを持ちます。
中間ネットワークはIPv4になります。
DirectAccessをサポートするようにファイアウォールを構成する必要があります。
トラフィックの種類ごとにどのファイアウォールルールを作成するべきですか
回答するには、適切なポートとプロトコルを正しいトラフィックタイプにドラッグします。
各ポートとプロトコルは、1回、複数回、またはまったく使用しないことができます。
コンテンツを表示するには、ペイン間の分割バーをドラッグするか、スクロールする必要があります。
