NEW QUESTION: 1Your client has three operating units.What are two ways in which you can exclude an operating unit where there are not enough personnel to allow segregation of duties?
A. In a model, create a new condition logic filter, select the within same operating unit attribute, select the value yes, and then perform your exclusion through the advanced options check box.**B.** Navigate to the Create Access Global Condition page and create a new condition logic filter, select the within same operating unit attribute, select the value yes, and then perform your exclusion through the advanced options check box.**C.** In a model, create a new condition logic filter, select the operating unit attribute and select the operating unit value.**D.** In a model, create a new condition logic filter, select the operating unit attribute, select the operating unit value, and then perform an exclusion through the advanced options check box.**E.** Navigate to the Create Access Global Condition page and create a new condition logic filter, select the operating unit attribute, select the operating unit value, and then perform an exclusion through the advanced options check box.**Answer: A**

NEW QUESTION: 2Sie erstellen die folgenden Ressourcen in einem Azure-Abonnement: * Eine Azure Container-Registrierungsinstanz mit dem Namen Registry1. * Ein AKS-Cluster (Azure Kubernetes Service) mit dem Namen Cluster1.Sie erstellen ein Container-Image mit dem Namen App1 auf Ihrer administrativen Workstation. Sie müssen App1 für Cluster1 bereitstellen. Was solltest du zuerst tun?
A. Führen Sie den Docker-Build-Befehl aus.**B.** Führen Sie den Docker-Push-Befehl aus.**C.** Erstellen Sie einen Hostpool in Cluster1.**D.** Führen Sie den Befehl az acr build aus.**Answer: D**
Explanation:ExplanationRun the az acr build command : Correct Choice az acr build command queues a quick build, providing streaming logs for an Azure Container Registry az acr build --registry[--agent-pool][--auth-mode {Default, None}][--build-arg][--file][--image][--no-format][--no-logs][--no-push][--no-wait][--platform][--resource-group][--secret-build-arg][--subscription][--target][--timeout][<SOURCE_LOCATION>]Create a host pool on Cluster1 : Incorrect ChoiceHost pools are a collection of one or more identical virtual machines (VMs) within Windows Virtual Desktop environments. It won't deploy the app to the cluster.Run the docker push command : Incorrect ChoiceUse docker push to share your images to the Docker Hub registry or to a self-hosted one. It won't deploy the app to the cluster.Run the docker build command : Incorrect ChoiceThis command will build an image from a Dockerfile. But in the question it has been said that image file is already built and need to deploy. This command will not deploy the image.Reference:

NEW QUESTION: 3Refer to the exhibit.A user attempts to connect to 10.10.10.1.80 using FTP over SSL with an FTPS client. Which virtual server will match and attempt to process the request?
A. vs_http**B.** vs_jutps**C.** nvfs**D.** vs_ftp**Answer: D**

NEW QUESTION: 4Refer to the exhibit.The spokes of the DMVPN with the given configuration

are having QoS issues. Which two actions can you take to resolve the problem? (Choose two.)**A.** Configure the bandwidth statement on the tunnel interface.**B.** Manually configure a QoS policy on the serial interface.**C.** Configure an NHRP group on the tunnel interface and associate it to a QoS policy.**D.** Modify the configuration of the IPsec policy to accept QoS policies.**E.** Configure qos pre-classify on the tunnel interface.**F.** Configure the bandwidth statement on the serial interface.**Answer: C,E**Explanation:It is possible to classify based on information that is encrypted, which is needed in this example. You can use an access-list, configured to match the private subnet behind the remote spoke. The qos pre-classify command is used on the tunnel interface, and is required because the traffic is classified by a parameter that is encrypted as the traffic leaves the physical outbound interface. L4 information from the IP data packet can also classify traffic destined to the same private subnet. The " nhrp map group group-name service-policy output parent-policy-name" command adds the NHRP group to the QoS policy map on the hub.
