NEW QUESTION: 1 A. Option EB. Option DC. Option AD. Option BE. Option C **Answer: A,B**
Explanation: Explanation With grey box penetration testing it means that you have limited insight into the device which would most probable by some code knowledge and this type of testing over the solution would provide the most security coverage under the circumstances. A Code review refers to the examination of an application (the new network based software product in this case) that is designed to identify and assess threats to the organization. With a static code review it is assumed that you have all the sources available for the application that is being examined. By performing a static code review over the front end source code you can provide adequate security coverage over the solution.
