To this end, the FCP_ZCS_AD-7.4 exam dumps have summarized some types of questions in the qualification examination to help you pass the FCP_ZCS_AD-7.4 exam.

NEW QUESTION: 1 A large IT company has an on-premise website which provides real-estate information such as renting, house prices and latest news to users. The website has a Java backend and a NoSQL MongoDB database that is used to store subscribers data. You are a cloud analyst and need to migrate the whole application to AWS platform. Your manager requires that a similar structure should be deployed in AWS for high availability. Moreover, a tracing framework is essential which can record data from both the client request and the downstream call to the database in AWS. Which AWS services should you choose to implement the migration? Select 3 Options. **A.** Trace the requests using AWS JAVA SDK and send logs to AWS CloudWatch Events. Create a CloudWatch dashboard to view the statistics. **B.** Use RDS Aurora as the database for the subscriber data because it is highly available and can scale up to 15 Read Replicas. **C.** Create a DynamoDB database to hold subscriber data. Set up an autoscaling policy for the read/write throughput. **D.** Use AWS X-Ray SDK to record data about incoming and outgoing requests. View the statistics graph in X-Ray console. **E.** Deploy an autoscaling group of Java backend servers to provide high availability **Answer: C,D,E**

NEW QUESTION: 2 Amazon S3がサーバー側の暗号化に提供するブロック暗号の種類は何ですか？ **A.** Triple DES **B.** Blowfish **C.** RC5 **D.** Advanced Encryption Standard **Answer: D** Explanation: <https://docs.aws.amazon.com/AmazonS3/latest/dev/serv-side-encryption.html>

NEW QUESTION: 3 An RSA key pair consists of public key and private key and is used to set up PKI. Which statement applies to RSA and PKI? **A.** It is possible to determine the RSA key-pair private key from it's corresponds public key **B.** the RSA key-pair is a symmetric cryptography **C.** The public key must be include in the certificate enrollment request **D.** When a router that does not have an RSA key pair request a certificate, the certificate request is sent, but a warning is show to generate the RSA key pair before a CA signed certificate is received **Answer: D**
