After all, the study must be completed through our PMO-CP test cram: PMO Certified Professional, Beneficiaries for passing the PMO Certified Professional exam.

NEW QUESTION: 1 Huawei FusionSphere Server Virtualization Solution supports live migration without shared storage. **A. TRUE B. FALSE** **Answer: A**

NEW QUESTION: 2 DRAG DROP A company deploys an Office 365 tenant. All employees use Skype for Business Online. You need to configure the network firewall to support Skype for Business Online. Which ports must you open? To answer, drag the appropriate port number to the correct feature or features. Each port number may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Select and Place: **Answer:** Explanation: Explanation/Reference: Transport Control Protocol (TCP), User Datagram Protocol (UDP) ports, and Protocol Numbers are important to TCP/IP networking, intranets, and the Internet. Ports and protocol numbers provide access to a host computer. However, they also create a security hazard by allowing uninvited access. Therefore, knowing which port to allow or disable increases a network's security. If the wrong ports or protocol numbers are disabled on a firewall, router, or proxy server as a security measure, essential services might become unavailable. Port 443 is used for Audio, video and application sharing sessions as well as data sharing sessions - For HTTPS. Port 5223 is used for mobile push notifications - Extensible Messaging and Presence Protocol (XMPP) client connection over SSL.

NEW QUESTION: 3 The administrator changes the organization time zone from "pacific daylight" to "central". Which users will be affected? **A. All users in the organization B. All users in central time zone C. None D. All users in pacific time zone** **Answer: C**

NEW QUESTION: 4 You are working on a system that appears to be hanging during the boot process. Which would be the course of action for determining which step in the boot process is causing the issue? **A. Boot the system, disable all services using the "svcs disable all" command, reboot and bring up each service individually. B. Boot the system into the "none" milestone, enable all services, then run svcs -ato determine the state of your services, as well as check for error messages in /var/svc/log. C. Interrupt the boot process before services are started with Stop-A or <CTRL><ALT><DELETE>. D. Boot the system into single user mode, run ps -ef to determine processes that are not running. E. Perform an Interactive boot, and disable services as they request startup.** **Answer: B** Explanation: * Booting a system using the none milestone can be very useful for debugging startup problems. There is no equivalent run level to the none milestone. * If problems with starting services occur, sometimes a system will hang during the boot. This procedure shows how to troubleshoot this problem. 2. Boot without starting any services. This command instructs the svc.startd daemon to temporarily disable all services and start su login on the console. ok boot -m milestone=none 2. Log in to the system as root. 3. Enable all services. # svcadm milestone all 4. Determine where the boot process is hanging. When the boot process hangs, determine which services are not running by running svcs -a. Look for error messages in the log files in /var/svc/log. Verify that all needed services are online. # svcs -x Verify

that the console-login service dependencies are satisfied. This command verifies that the login process on the console will run. # `svcs -l system/console-login:default 6`. Continue the normal booting process. Reference: [How to Boot Without Starting Any Services](#)
