Attach libraries to Spark cluster: you use the Twitter APIs to send tweets to Event Hubs. You also use the Apache Spark Event Hubs connector to read and write data into Azure Event Hubs. To use these APIs as part of your cluster, add them as libraries to Azure Databricks and associate them with your Spark cluster. Step 3: Create and configure a Notebook that consumes the streaming data. You create a notebook named ReadTweetsFromEventHub in Databricks workspace.
