Answer: B
Explanation: A user can increase the desired capacity of the Auto Scaling group and Auto Scaling will launch a new instance as per the new capacity. The newly launched instances will be registered with ELB if AutoScaling group is configured with ELB. If the user decreases the minimum size the instances will be removed from Auto Scaling. A. It is applied in the incoming direction only.
B. Shaping buffers excess packets.
C. Shaping can remark excess packets.
D. It supports interaction with frame relay congestion indication.

Traffic shaping can also interact with a Frame Relay network, adapting to indications of Layer 2 congestion in the WAN. For example, if the backward-explicit congestion notification (BECN) bit is received, the router can lower the rate limit to help reduce congestion in the Frame Relay network.
