If in this period, the certified test center change the MB-335 Q&A, we will send the latest version to you in time, Everyone wants to buy a product with reasonable prices.

Free demo will help you have a better understanding [D-RPVM-A-01 Clear Exam](#) of what you are going to buy, and we also recommend you try the free demo before buying.

**NEW QUESTION: 1**What are two forms of SSL VPN? (Choose two)**A.** port forwarding**B.** Full Tunnel Mode**C.** Cisco AnyConnect**D.** Cisco IOS WebVPN**Answer: A,B****Explanation:**  
<https://www.cisco.com/c/en/us/support/docs/security/ssl-vpn-client/70664-IOStinclient.html>  
Thin-Client SSL VPN technology can be used to allow secure access for applications that use static ports. Examples are Telnet (23), SSH (22), POP3 (110), IMAP4 (143), and SMTP (25). The Thin-Client can be user-driven, policy-driven, or both. Access can be configured on a user-by-user basis, or group policies can be created that include one or more users. SSL VPN technology can be configured in three main modes: Clientless SSL VPN (WebVPN), Thin-Client SSL VPN (Port Forwarding), and SSL VPN Client (SVC-Full Tunnel Mode).  
1. Clientless SSL VPN (WebVPN): A remote client needs only an SSL-enabled web browser to access http- or https-enabled web servers on the corporate LAN. Access is also available to browse for Windows files with the Common Internet File System (CIFS). A good example of http access is the Outlook Web Access (OWA) client. Refer to Clientless SSL VPN (WebVPN) on Cisco IOS using SDM Configuration Example in order to learn more about the Clientless SSL VPN.  
2. Thin-Client SSL VPN (Port Forwarding) A remote client must download a small, Java-based applet for secure access of TCP applications that use static port numbers. UDP is not supported. Examples include access to POP3, SMTP, IMAP, SSH, and Telnet. The user needs local administrative privileges because changes are made to files on the local machine. This method of SSL VPN does not work with applications that use dynamic port assignments, for example, several FTP applications.  
3. SSL VPN Client (SVC-Full Tunnel Mode): The SSL VPN Client downloads a small client to the remote workstation and allows full, secure access to the resources on the internal corporate network. The SVC can be downloaded permanently to the remote station, or it can be removed after the secure session ends.

**NEW QUESTION: 2**Conway's customer has two production IBM Lotus Domino domains. The first domain, Renovations, has users both on-premises and in the service. The second domain, PowerRenov, only has users on-premises. To route mail from PowerRenov users to Renovations users in the service ....**A.** required Connection documents are automatically created by the Domain Configuration tool.**B.** a passthru server is required for each domain: Renovations and PowerRenov.**C.** four mail hub servers are required: two in each on-premises Lotus Domino domain.**D.** PowerRenov routes mail through Renovations.**Answer: D**

**NEW QUESTION: 3**The price an investor pays for a listed option is called the**A.** premium**B.** exercise price**C.** spread**D.** strike price**Answer: A****Explanation:**premium. That's the term for the option cost.
