Once we release new version you can always download free within one year, We will offer help insofar as I can, our ISA-IEC-62443 study guide materials find the best meaning in those candidates who have struggled hard to pass the ISA-IEC-62443 certification exams.

NEW QUESTION: 1Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs a Server Core installation of Windows Server 2012 R2. You need to deploy a certification authority (CA) to Server1. The CA must support the auto-enrollment of certificates. Which two cmdlets should you run? (Each correct answer presents part of the solution. Choose two.)
A. Install-AdcsWebEnrollment
B. Add-CAAuthorityInformationAccess
C. Install-AdcsOnlineResponder
D. Install-AdcsCertificationAuthority
E. Add-WindowsFeature

Answer: A, D
Explanation: Explanation B. The Install-AdcsCertificationAuthority cmdlet performs installation and configuration of the AD CS CA role service. It can be used to install a root CA. Example:

```
Install-AdcsCertificationAuthority -CAType StandaloneRootCA -CACommonName "ContosoRootCA" -KeyLength 2048 -HashAlgorithm SHA1 -CryptoProviderName "RSA#Microsoft Software Key Storage Provider"
```

E: The Install-AdcsWebEnrollment cmdlet performs initial installation and configuration of the Certification Authority Web Enrollment role service. Note: Prior to the availability of Certificate Enrollment Web Services, AD CS required that client computers configured for certificate auto-enrollment be connected directly to the corporate network. Certificate Enrollment Web Services allows organizations to enable AD CS using a perimeter network. This allows users and computers outside the corporate network to enroll for certificates. Certificate Enrollment web service Reference: Deploying AD CS Using Windows PowerShell

NEW QUESTION: 2 A. Option C B. Option B C. Option D D. Option A
Answer: B, D

NEW QUESTION: 3 Which of the following are specified in copy control table? (Choose three)
