Will you feel nervous for the exam?

NEW QUESTION: 1**HOTSPOT**You have a cloud service that runs an external process that is named MyStartupTask.cmd. The cloud service runs this external process when the web role starts. The external process writes information to the Windows registry.You set the value of an environment variable named MyID to the deployment ID for the current web role instance. The external process must complete writing the information to the Windows registry before the web role starts to accept web traffic.You need to configure the cloud service. How should you complete the relevant markup? To answer, select the appropriate option or options in the answer area.**Hot Area:****Answer:** Explanation:Explanation/Reference:Explanation:Target 1: executionContext="elevated" taskType="simple"executionContext - Specifies the privilege level for the startup task. The privilege level can be limited or elevated:Elevated: The startup task runs with administrator privileges. This allows startup tasks to install programs, make IIS configuration changes, perform registry changes, and other administrator level tasks, without increasing the privilege level of the role itself.
