NEW QUESTION: 1A client is starting a new marketing program which will generate one million forms per year. The client wants to buy enough storage for five years. Forms will be paper-based and web-based. For year one, 80% of the forms received will be paper-based and must be scanned. After that, 80% of the forms will be web-based. Paper forms must be scanned in color and will require 300 KB each, while web forms require 10 KB. How much storage should be recommended?**A. 164 GBB. 514 GBC. 82 GBD. 5.14 TerabyteAnswer: B**

NEW QUESTION: 2A. Option AB. Option EC. Option BD. Option CE. Option D**Answer: B**
Explanation:Encryption further adds a level of security to the system as anyone having access to the database of passwords cannot reverse the process of encryption to know the actual passwords which isn't the case if the passwords are stored simply.

NEW QUESTION: 3A. Option AB. Option DC. Option BD. Option C**Answer: B**

NEW QUESTION: 4You are designing a custom IAM policy that would allow uses to list buckets in S3 only if they are MFA authenticated. Which of the following would best match this requirement?**A)B)C)D)A. Option AB. Option BC. Option CD. Option DAnswer: A**
Explanation:
ExplanationThe Condition clause can be used to ensure users can only work with resources if they are MFA authenticated.Option B and C are wrong since the aws:MultiFactorAuthPresent clause should be marked as true. Here you are saying that onl if the user has been MFA activated, that means it is true, then allow access.Option D is invalid because the "boor clause is missing in the evaluation for the condition clause.Boolean conditions let you construct Condition elements that restrict access based on comparing a key to "true" or "false."Here in this scenario the boot attribute in the condition element will return a value True for option A which will ensure that access is allowed on S3 resources.For more information on an example on such a policy, please visit the following URL:
