NEW QUESTION: 3 Your shop has a mixture of REXX, COBOL and native SQL procedures. For performance reasons the COBOL stored procedures must be configured to allow more than one concurrent stored procedure execution for each address space started by WLM. What is the minimum number of different WLM stored procedure address space JCL set(s) that must be defined to accomplish this? **A.** 2 -- one for REXX / COBOL plus one for native SQL stored procedures. **B.** 1 -- they can all be executed in the same WLM address space. **C.** 3 -- one for each type of stored procedure. **D.** 2 -- one for COBOL plus one for REXX. **Answer: D**

NEW QUESTION: 4 A company is creating a centralized logging service running on Amazon EC2 that will receive and analyze logs from hundreds of AWS accounts. AWS PrivateLink is being used to provide connectivity between the client services and the logging service. In each AWS account with a client an interface endpoint has been created for the logging service and is available. The logging service running on EC2 instances with a Network Load Balancer (NLB) are deployed in different subnets. The clients are unable to submit logs using the VPC endpoint. Which combination of steps should a solutions architect take to resolve this issue? (Select TWO) **A.** Check that the NACL is attached to the logging service subnets to allow communications to and from the interface endpoint subnets. Check that the NACL is attached to the interface endpoint subnet to allow communications to and from the logging service subnets running on EC2 instances. **B.** Check the security group for the logging service running on EC2 instances to ensure it allows ingress from the clients. **C.** Check the security group for the NLB to ensure it

allows ingress from the interface endpoint subnets**D**. Check the security group for the logging service running on the EC2 instances to ensure it allows ingress from the NLB subnets.**E**. Check that the NACL is attached to the logging service subnet to allow communications to and from the NLB subnets Check that the NACL is attached to the NLB subnet to allow communications to and from the logging service subnets running on EC2 instances.**Answer: A,E**
