After carefully calculating about the costs and benefits, our 1z0-1041-23 prep guide would be the reliable choice for you, for an ascending life.

NEW QUESTION: 1Which of the following protocols operates at the session layer (layer 5)?
A. RPC
B. IGMP
C. LDP
D. SPX
Answer: A
Explanation:The socket method of network use is a message-based system, in which one process writes a message to another. This is a long way from the procedural model. The remote procedure call is intended to act like a procedure call, but to act across the network transparently. The process makes a remote procedure call by pushing its parameters and a return address onto the stack, and jumping to the start of the procedure. The procedure itself is responsible for accessing and using the network. After the remote execution is over, the procedure jumps back to the return address. The calling process then continues. RPC works at the Session layer of the OSI model.

NEW QUESTION: 2Your network contains three IP subnets that are configured as shown in the following table. The network contains one Active Directory domain that has two domain controllers in Subnet1. Subnet2 contains a server named Server1. You start installing Dynamics CRM 2015 on Server1 and you receive the following error message: "Setup Cannot Find the Selected Organizational Unit." You run the ipconfig.exe command from Server1 and you discover the following information: IP address: 192.168.22.11 Subnet mask: 255.255.0.0 DNS server: 10.0.0.100 You verify that you can access websites on the Internet from Server1. You need to resolve the issue that prevents you from installing Dynamics CRM. What should you do?
A. Modify the DNS server of Server 1.
B. Add a domain controller to Subnet2.
C. Move Server1 to Subnet1.
D. Modify the IP address of Server 1.
Answer: C
