NEW QUESTION: 1 A solution architect has been tasked with designing a new environment that meets the growing needs of a company, and has obtained this information: * Each new server will use a single 2-port 10Gb Converged Network Adapter (CNA) for both network and storage access. * The network team has replaced all network equipment with a 10Gb fabric. * The new environment will host both web servers and Oracle database servers. * Resources will not be overcommitted under regular operations to mitigate performance issues. * The business needs a tool to understand application failures. * \$1 million has been budgeted for the data center expansion project. Based on this information, which two statements are requirements for the new design? (Choose two.)
A. An Enterprise monitoring solution must be in place for Root Cause Analysis.
B. vSphere provides the ability to overcommit resources without performance issues.
C. The Oracle team will ensure sufficient database performance at the application level.
D. vCPU count must be equal or less than the physical CPU core count unless there is a failure.

Answer: A,B

NEW QUESTION: 2 The chief security officer (CSO) has issued a new policy that requires that all internal websites be configured for HTTPS traffic only. The network administrator has been tasked to update all internal sites without incurring additional costs. Which of the following is the best solution for the network administrator to secure each internal website?
A. Use certificates signed by a public CA
B. Use certificates signed by the company CA
C. Use a self-signed certificate on each internal server
D. Use a signing certificate as a wild card certificate
Answer: C
Explanation: This is a way to update all internal sites without incurring additional costs? To be a CA (Certificate Authority), you need an infrastructure that consists of considerable operational elements, hardware, software, policy frameworks and practice statements, auditing, security infrastructure and personnel.

NEW QUESTION: 3 Which of the following STP states indicates an inactivated port due to a loop?
A. Learning
B. Disabled
C. Forwarding
D. Blocking
Answer: D
