NEW QUESTION: 1Your network contains an Active Directory domain named contoso.com. All domain controllers run Windows Server 2012 R2. An organizational unit (OU) named OU1 contains 200 client computers that run Windows 8 Enterprise. A Group Policy object (GPO) named GPO1 is linked to OU1. You make a change to GPO1. You need to force all of the computers in OU1 to refresh their Group Policy settings immediately. The solution must minimize administrative effort. Which tool should you use?
A. Group Policy Management Console (GPMC)
B. The Set-AdComputer cmdlet
C. The Gpupdate command
D. Server Manager
Answer: A
Explanation: In the previous versions of Windows, this was accomplished by having

the user run GPOupdate.exe on their computer. Starting with Windows Server? 2012 and Windows?8, you can now remotely refresh Group Policy settings for all computers in an OU from one central location through the Group Policy Management Console (GPMC). Or you can use the Invoke-GPOupdate cmdlet to refresh Group Policy for a set of computers, not limited to the OU structure, for example, if the computers are located in the default computers container. Note: Group Policy Management Console (GPMC) is a scriptable Microsoft Management Console (MMC) snap-in, providing a single administrative tool for managing Group Policy across the enterprise. GPMC is the standard tool for managing Group Policy. Incorrect: Not B: Secedit configures and analyzes system security by comparing your current configuration to at least one template. Reference: Force a Remote Group Policy Refresh (GPOupdate)

NEW QUESTION: 2 According to CIMA's Code of Ethics, CIMA members should not allow bias, conflict of interest or the influence of other people to override their professional judgement. This is an example of: **A.** professional behaviour. **B.** objectivity. **C.** professional competence and due care. **D.** integrity. **Answer: B** Explanation: Explanation Reference [http://www.cimaglobal.com/Documents/Professional%20ethics%20docs/2015%20code%20of%20ethics/CIMA_\(4\)](http://www.cimaglobal.com/Documents/Professional%20ethics%20docs/2015%20code%20of%20ethics/CIMA_(4))

NEW QUESTION: 3 You have been asked to test the performance of a software and system update to a North American mobile trivia quiz game application. The quiz app is available on major app stores serving English-speaking users. The number of concurrent users planned for is 5 million. Winning quiz participants are promised a share of an allocated cash prize. Once participants start playing, their quiz sessions must not be lost especially if all previous questions were answered correctly. The application owner wants to ensure that 99% of quiz sessions are maintained (up to 495 million sessions) until the last answer has been successfully recorded. What is the best way to address the performance testing for concurrency? **A.** Conduct a network assessment of popular mobile data providers to ensure excessive frame loss and latency do not cause more than 15% of trivia answer arrivals to occur outside acceptable arrival time. **B.** Review the asynchronous session management algorithm, review the production systems implementation including load balancing and in-memory database schema, and conduct performance tests on these production systems while there are no active quiz events. **C.** Enable and schedule the quiz app to act as a virtual user on users' mobile devices while the production system is in-between quiz events. This will ensure realistic end-to-end testing. **D.** Conduct performance tests on production systems while there are no active quiz events. **Answer: B**
