Then you can learn and practice it, We are a team of the experienced professionals, Fortinet Network Security Expert FCP\_FAZ\_AD-7.4 Dumps Questions PDF.

**NEW QUESTION: 1** For each of the following statements, select yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point. **Answer:** Explanation: Explanation

**NEW QUESTION: 2** A healthcare services company is concerned about the growing costs of software licensing for an application for monitoring patient wellness. The company wants to create an audit process to ensure that the application is running exclusively on Amazon EC2 Dedicated Hosts. A DevOps Engineer must create a workflow to audit the application to ensure compliance. What steps should the Engineer take to meet this requirement with the LEAST administrative overhead? **A.** Use AWS Systems Manager Configuration Compliance. Use calls to the put-compliance-items API action to scan and build a database of noncompliant EC2 instances based on their host placement configuration. Use an Amazon DynamoDB table to store these instance IDs for fast access. Generate a report through Systems Manager by calling the list-compliance-summaries API action. **B.** Use AWS Config Identify all EC2 instances to be audited by enabling Config Recording on all Amazon EC2 resources for the region. Create a custom AWS Config rule that triggers an AWS Lambda function by using the "config-rule-change-triggered" blueprint. Modify the Lambda evaluateCompliance () function to verify host placement to return a NON\_COMPLIANT result if the instance is not running on an EC2 Dedicated Host. Use the AWS Config report to address noncompliant instances. **C.** Use custom Java code running on an EC2 instance. Set up EC2 Auto Scaling for the instance depending on the number of instances to be checked. Send the list of noncompliant EC2 instance IDs to an Amazon SQS queue. Set up another worker instance to process instance IDs

from the SQS queue and write them to Amazon DynamoDB. Use an AWS Lambda function to terminate noncompliant instance IDs obtained from the queue, and send them to an Amazon SNS email topic for distribution.**D.** Use AWS CloudTrail. Identity all EC2 instances to be audited by analyzing all calls to the EC2 RunCommand API action. Invoke an AWS Lambda function that analyzes the host placement of the instance. Store the EC2 instance ID of noncompliant resources in an Amazon RDS MySQL DB instance. Generate a report by querying the RDS instance and exporting the query results to a CSV text file.**Answer: B**

### **NEW QUESTION: 3**

画像処理機能を備えた電子メールまたはファックスから画像内のデータをキャプチャできる製品はどれですか？**A.** ビジネスオートメーションインサイト**B.** ビジネスオートメーションコンテンツアナライザー**C.** データキャップ**D.** Business Automation Studio**Answer: D**
