Our company is a professional certificate exam materials provider.

**NEW QUESTION: 1A** plumbing repair company uses Dynamics 365 Customer Service. The company wants to better serve customers by offering quicker response times and improving processes based on customer feedback. You need to recommend solutions for the company. What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point. **Answer:** Explanation:

**NEW QUESTION: 2A.** Option BB. Option DC. Option AD. Option C **Answer: B**

**NEW QUESTION: 3DRAG DROP** Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series. You are developing a database to track customer orders. The database contains the following tables: Sales.Customers, Sales.Orders, and Sales.OrderLines. The following table describes the columns in Sales.Customers. The following table describes the columns in Sales.Orders. The following table describes the columns in Sales.OrderLines. You need to create a function that accepts a CustomerID as a parameter and returns the following information: - all customer information for the customer - the total number of orders for the customer - the total price of all orders for the customer - the average quantity of items per order How should you complete the function definition? To answer, drag the appropriate Transact-SQL segment to the correct locations. Transact-SQL segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. **Answer:** Explanation: Explanation: Box1: RETURNS TABLE The function should return the following information: - all customer information for the customer - the total number of orders for the customer - the total price of all orders for the customer - the average quantity of items per order Box 2: COUNT The function should return the total number of orders for the customer. Box 3: SUM The function should return the total price of all orders for the customer. Box 3. AVG The function should return the average quantity of items per order. Box 4: GROUP BY Need to use GROUP BY for the aggregate functions. References: <https://msdn.microsoft.com/en-us/library/ms186755.aspx>
