You need to identify which storage space contains the new hard disk. Which storage space contains the new disk? **A. Users B. Primordial C. Data D. Backups**
Answer: B
Explanation: Explanation/Reference: Explanation: New Disks (Unallocated space) added to Primordial space Primordial Pool? All storage that meets acceptable criteria for Storage Spaces will be placed in the Primordial Pool. This can be considered the default pool for devices from which any other pools will be created. Notice that there are no other virtual disks or pools at this point. The Primordial Pool will only consist of physical storage devices that do not belong to any other pools.

Answer: D

NEW QUESTION: 3 SCENARIO Please use the following to answer the next QUESTION: Cheryl is the sole owner of Fitness Coach, Inc., a medium-sized company that helps individuals realize their physical fitness goals through classes, individual instruction, and access to an extensive indoor gym. She has owned the company for ten years and has always been concerned about protecting customer's privacy while maintaining the highest level of service. She is proud that she has built long-lasting customer relationships. Although Cheryl and her staff have tried to make privacy protection a priority, the company has no formal privacy policy. So Cheryl hired Janice, a privacy professional, to help her develop one. After an initial assessment, Janice

created a first of a new policy. Cheryl read through the draft and was concerned about the many changes the policy would bring throughout the company. For example, the draft policy stipulates that a customer's personal information can only be held for one year after paying for a service such as a session with personal trainer. It also promises that customer information will not be shared with third parties without the written consent of the customer. The wording of these rules worry Cheryl since stored personal information often helps her company to serve her customers, even if there are long pauses between their visits. In addition, there are some third parties that provide crucial services, such as aerobics instructors who teach classes on a contract basis. Having access to customer files and understanding the fitness levels of their students helps instructors to organize their classes. Janice understood Cheryl's concerns and was already formulating some ideas for revision. She tried to put Cheryl at ease by pointing out that customer data can still be kept, but that it should be classified according to levels of sensitivity. However, Cheryl was skeptical. It seemed that classifying data and treating each type differently would cause undue difficulties in the company's day-to-day operations. Cheryl wants one simple data storage and access system that any employee can access if needed. Even though the privacy policy was only a draft, she was beginning to see that changes within her company were going to be necessary. She told Janice that she would be more comfortable with implementing the new policy gradually over a period of several months, one department at a time. She was also interested in a layered approach by creating documents listing applicable parts of the new policy for each department. What is the best reason for Cheryl to follow Janice's suggestion about classifying customer data? **A.** It will help employees stay better organized **B.** It will prevent the company from collecting too much personal information (PI) **C.** It will help the company meet a federal mandate **D.** It will increase the security of customers' personal information (PI) **Answer: D**

NEW QUESTION: 4 You have an enterprise-wide Azure Data Lake Storage Gen2 account. The data lake is accessible only through an Azure virtual network named VNET1. You are building a SQL pool in Azure Synapse that will use data from the data lake. Your company has a sales team. All the members of the sales team are in an Azure Active Directory group named Sales. POSIX controls are used to assign the Sales group access to the files in the data lake. You plan to load data to the SQL pool every hour. You need to ensure that the SQL pool can load the sales data from the data lake. Which three actions should you perform? Each correct answer presents part of the solution. NOTE: Each area selection is worth one point. **A.** Add the managed identity to the Sales group. **B.** Create a shared access signature (SAS). **C.** Use the managed identity as the credentials for the data load process. **D.** Add your Azure Active Directory (Azure AD) account to the Sales group. **E.** Use the shared access signature (SAS) as the credentials for the data load process. **F.** Create a managed identity. **Answer: A,D,F** Explanation: The managed identity grants permissions to the dedicated SQL pools in the workspace. Note: Managed identity for Azure resources is a feature of Azure Active Directory. The feature provides Azure services with an automatically managed identity in Azure AD Reference: <https://docs.microsoft.com/en-us/azure/synapse-analytics/security/synapse-workspace-managed-identity>
