NEW QUESTION: 1 Refer to the exhibit. What must be configured to establish a successful connection from Host A to switch SW-A through router RT-A? **A.** default gateway on SW-A. **B.** VLAN 1 on RT-A. **C.** IP routing on SW-A. **D.** crossover cable connecting SW-A and RT-A. **Answer: A**
Explanation: In order for the switch to reach networks that are not local, such as networks attached to different interfaces of the router, it will need to set its default gateway to be the IP address of the attached router.

NEW QUESTION: 2 Which of the following would be the most suitable investment for a client who has retired and needs some current income to augment her social security check? **A.** growth fund **B.** U.S. government bond fund **C.** variable life policy **D.** money market fund **Answer: B**
Explanation: Of the choices provided, the most suitable investment for a client who has retired and needs some current income to augment her social security check would be a U.S. government bond fund. The growth fund is mostly invested in stocks that provide their return in the form of capital appreciation, not dividend income. The variable life policy would not offer her the current income she needs and may even have a surrender charge. Furthermore, these policies are insurance, not investments. A money market fund is good for capital preservation and some of her funds should be invested in a money market fund to meet this objective, but it will not provide her with current income. A U.S. government bond fund is less risky than other bond funds--although its value will fluctuate with interest rate changes--and will provide her with the supplemental income she requires.
