I believe our CTAL-TM training online will be the highest value with competitive price comparing other providers, We use state of the art security systems to protect our member's information.

NEW QUESTION: 1 Which statement about the RPF interface in a BIDIR-PIM network is true? **A.** In a BIDIR-PIM network, the RPF interface is always the interface that is used to reach the source. **B.** There is no RPF interface concept in BIDIR-PIM networks. **C.** In a BIDIR-PIM network, the RPF interface can be the interface that is used to reach the PIM rendezvous point or the interface that is used to reach the source. **D.** In a BIDIR-PIM network, the RPF interface is always the interface that is used to reach the PIM rendezvous point. **Answer: D** Explanation: RPF stands for "Reverse Path Forwarding". The RPF Interface of a router with respect to an address is the interface that the MRIB indicates should be used to reach that address. In the case of a BIDIR-PIM multicast group, the RPF interface is determined by looking up the Rendezvous Point Address in the MRIB. The RPF information determines the interface of the router that would be used to send packets towards the Rendezvous Point Link for the group. Reference. <https://tools.ietf.org/html/rfc5015>

NEW QUESTION: 2 To define portlet actions in separate classes using MVCPortlet: (Please select all correct answers.) **A.** Each class must implement a processCommand() method that returns a boolean to indicate if the action completed **B.** Each class must implement the ActionCommand interface **C.** Each class must implement the MVCAction interface **D.** Each class must implement a renderCommand() method **Answer: A,B**
