NEW QUESTION: 1 DRAG DROP You need to meet the disaster recovery requirements. What should you do? (To answer, drag the appropriate terms to the correct location or locations in the answer area. Each term may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.) **Answer:** Explanation: Note: * From scenario: / Log shipping must be used to send transaction log backups to the instance of SQL Server that is running in the disaster recovery site. / A hardware load-balancer is configured to balance traffic between PROD-WEB-01 and PROD-WEB-02. Both are running SQL Server 2012. / The SharePoint 2013 Disaster Recovery farm topology consists of the servers listed in the following table. / Log shipping must be used to send transaction log backups to the instance of SQL Server that is running in the disaster recovery site. * SQL Server Log shipping allows you to automatically send transaction log backups from a primary database on a primary server instance to one or more secondary databases on separate secondary server instances. The transaction log backups are applied to each of the secondary databases individually. * Terms and Definitions / primary server The instance of SQL Server that is your production server. / primary database The database on the primary server that you want to back up to another server. All administration of the log shipping configuration through SQL Server Management Studio is performed from the primary database. / secondary server The instance of SQL Server where you want to keep a warm standby copy of your primary database. / secondary database The warm standby copy of the primary database. The secondary database may be in either the RECOVERING state or the STANDBY state, which leaves the database available for limited read-only access.

NEW QUESTION: 2 Bubba buys one XYZ September 50 call at \$7 and sells one XYZ September 60 call at \$3. At that time, XYZ stock is at \$55. Bubba has no other stock positions. At what must XYZ trade for Bubba to break even? **A. \$60 B. \$54 C. \$57 D. \$55** **Answer: B** Explanation: Explanation/Reference: Explanation: \$54. Bubba's position is a bullish spread. The breakeven is determined by adding the debit amount to the lower strike price. The debit amount is \$4 (\$7 -

\$3). Adding that to \$50 equals \$54.

NEW QUESTION: 3You are building out a large-scale FC storage network where all switches are cascaded.
