No limits on time and place.

NEW QUESTION: 1Your customer requested that you create a new report and make it available in the agent's navigation set.You create the report and add it to the agent's navigation set. However, the agents cannot see the new report.Select three actions you must perform to identify the reason the report does not display for the agents.**A.** Verify that profile permissions in Service has a check for "Read" under Incidents.**B.** Request the agents to log off and log back on.**C.** Review the navigation set in the profile to ensure it matches the navigation set you updated.**D.** Validate the Analytics permissions set for the report**E.** Check the Customize Navigation Sets selection.**F.** Review the filters in the report to ensure the Assign field selection is set to Logged In.**Answer: C,D,F**Explanation:Note:*The staff members assigned to the profile have access to only those reports and items defined in their profile's navigation set unless you allow staff members with that profile to customize their navigation set.*Navigation sets control the navigation lists and buttons that staff members see on the navigation pane of the RightNow CX Console.Navigation sets can be created for staff members who have any combination of responsibilities, and can be assigned to staff members in their profiles.Every staff member has a profile, and every profile must include a navigation set that all staff members with that profile use when they work in RightNow CX.A navigation set is a combination of navigation buttons and their associated navigation lists.

NEW QUESTION: 2Mountkirk Games' gaming servers are not automatically scaling properly. Last month, they rolled out a newfeature, which suddenly became very popular. A record number of users are trying to use the service, butmany of them are getting 503 errors and very slow response times. What should they investigate first?**A.** Verify that the new feature code did not introduce any performance bugs**B.** Verify that the load-testing team is not running their tool against production**C.** Verify that the project quota hasn't been exceeded**D.** Verify that the database is online**Answer: C**Explanation:Explanation/Reference:Explanation: 503 is service unavailable error. If the database was online everyone would get the 503 error.

NEW QUESTION: 3A user is planning a highly available application deployment with EC2. Which of the below mentioned options will not help to achieve HA?**A.** Elastic IP address**B.** AMI**C.** PIOP**D.** Availability Zones**Answer: C**Explanation:In Amazon Web Service, the user can achieve HA by deploying instances in multiple zones. The elastic IP helps the user achieve HA when one of the instances is down but still keeps the same URL. The AMI helps launching the new instance. The PIOPS is for the performance of EBS and does not help for HA.Reference: http://media.amazonwebservices.com/AWS_Web_Hosting_Best_Practices.pdf
