The best thing about Estruturit is, Reliable H35-211_V2.5-ENU Braindumps Ebook they are offering 100% money back guarantee to their clients.

NEW QUESTION: 1 DRAG DROP You need to configure access to the Certificate Revocation Lists (CRLs). How should you configure the access? To answer, drag the appropriate protocol or servers to the correct network type. Each protocol or server may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Select and Place: **Answer:** Explanation: Explanation/Reference: Internet: Protocol: HTTP, Server or servers: DETROOTCA Internal Network: Protocol: HTTPS, Server or servers: DETCA01 and CHICA01

NEW QUESTION: 2 A. Option FB. Option AC. Option ED. Option DE. Option BF. Option C **Answer: B,C,D** Explanation: + IPsec Transport mode is used for end-to-end communications, for example, for communication between a client and a server or between a workstation and a gateway (if the gateway is being treated as a host). A good example would be an encrypted Telnet or Remote Desktop session from a workstation to a server. + IPsec supports two encryption modes: Transport mode and Tunnel mode. Transport mode encrypts only the data portion (payload) of each packet and leaves the packet header untouched. Transport mode is applicable to either gateway or host implementations, and provides protection for upper layer protocols as well as selected IP header fields. Source: <http://www.firewall.cx/networking-topics/protocols/870-ipsec-modes.html> http://www.cisco.com/c/en/us/td/docs/net_mgmt/vpn_solutions_center/2-0/ip_security/provisioning/guide/IPsecPG1.html Generic Routing Encapsulation (GRE) is often deployed with IPsec for several reasons, including the following: + IPsec Direct Encapsulation

supports unicast IP only. If network layer protocols other than IP are to be supported, an IP encapsulation method must be chosen so that those protocols can be transported in IP packets.+ IPmc is not supported with IPsec Direct Encapsulation. IPsec was created to be a security protocol between two and only two devices, so a service such as multicast is problematic. An IPsec peer encrypts a packet so that only one other IPsec peer can successfully perform the de-encryption. IPmc is not compatible with this mode of operation.Source: https://www.cisco.com/application/pdf/en/us/guest/netsol/ns171/c649/ccmigration_09186a008074f26a.pdf

NEW QUESTION: 3The government uses CTI to provide up-to-the-minute election results. Which feature would probably NOT be part of such a system?**A.** Fax-on-demand**B.** Audiotex**C.** Interactive voice response**D.** Calling line ID**Answer: B**

NEW QUESTION: 4QUESTION NO: 240 DRAG DROP - (Topic 2)**Answer:** Explanation:
