NEW QUESTION: 1 Which of the following is MOST important to present to stakeholders to help obtain support for implementing a new information security strategy?
A. An overview of competitors' information security strategies
B. The potential impact of current threats
C. A statement of generally accepted good practices
D. An assessment of current technological exposures
Answer: B

NEW QUESTION: 2 A. Option C B. Option D C. Option B D. Option A
Answer: D
Explanation: In the event of a planned or unplanned outage of a DB instance, Amazon RDS automatically switches to a standby replica in another Availability Zone if the user has enabled Multi AZ. The automatic failover mechanism simply changes the DNS record of the DB instance to point to the standby DB instance. As a result, the user will need to re-establish any existing connections to the DB instance. However, as the DNS is the same, the application can access DB seamlessly.

NEW QUESTION: 3 When reviewing an active project, an IS auditor observed that, because of a reduction in anticipated benefits and increased costs, the business case was no longer valid. The IS auditor should recommend that the:
A. business case be updated and possible corrective actions be identified.
B. project be discontinued.
C. project be completed and the business case be updated later.
D. project be returned to the project sponsor for reapproval.
Answer: A
Explanation: An IS auditor should not recommend discontinuing or completing the project before reviewing an updated business case. The IS auditor should recommend that the business case be kept current throughout the project since it is a key input to decisions made throughout the life of any project.
