NEW QUESTION: 1 An organisation is assessing risks so it can prioritize its mitigation actions. Following are the risks and their probability and impact: Which of the following is the order of priority for risk mitigation from highest to lowest? **A.** A, B, C, D **B.** A, D, B, C **C.** D, A, C, B **D.** B, C, A, D **E.** C, B, D, A **Answer: A**

NEW QUESTION: 2 A sixteen-year-old patient with ascending paralysis was intubated and is receiving mechanical ventilation. The nurse should include what plan of care to help the patient cope with his illness? **A.** Provide intravenous sedatives and reduce distractions **B.** Give full control to the patient over care decisions **C.** Provide positive feedback and encourage active range-of-motion **D.** Provide information, encourage relaxation, and give positive feedback **Answer: D** **Explanation:** The nurse should provide information, encourage relaxation, and give positive feedback in the plan of care to help the patient cope with his illness. The patient with Guillain-Barre syndrome experiences fear and anxiety from the ascending paralysis and sudden onset of the disorder. The nurse can alleviate these fears by providing accurate information about the patient's condition, giving expert care and positive feedback to the patient, and encouraging relaxation and distraction. The family can become involved with selected care activities and provide diversion for the patient as well.

NEW QUESTION: 3 A developer has a page with two extensions overriding the Standard controller for Case. What will happen when a user clicks the command button? **A.** Save from CaseExtensionOne will be executed **B.** Save from Case Standard Controller will be executed **C.** All of the three Save methods will be executed **D.** Save from CaseExtensionTwo will be executed **Answer: A**

NEW QUESTION: 4 You support Windows 10 Enterprise computers that are members of an Active Directory domain. Recently, several domain user accounts have been configured with super-mandatory user profiles. A user reports that she has lost all of her personal data after a computer restart. You need to configure the user's computer to prevent possible user data loss in the future. What should you do? **A.** Add the .dat extension to the user profile name. **B.** Configure the user's documents library to include folders from network shares. **C.** Configure Folder Redirection by using the domain group policy. **D.** Remove the .man extension from the user profile name. **Answer: C** **Explanation:** Folder Redirection allows administrators to redirect the path of a folder to a new location, which can be a folder on the local computer or a directory on a network file share. Users can then work with documents on a server as if the documents were based on a local drive, but are available to the user from any computer on the network. Folder Redirection can be found under Windows Settings in the console tree by

editing domain-based Group Policy via the Group Policy Management Console (GPMC).
