NEW QUESTION: 2You need to investigate one of the instances which is part of your Autoscaling Group. How would you implement this.**A.** Put the instance in a standby state**B.** Suspend the AddToLoadBalancer process**C.** Put the instance in a InService state**D.** Suspend the AZRebalance process so that Autoscaling will not terminate the instance**Answer: A****Explanation:** ExplanationThe AWS Documentation mentions Auto Scaling enables you to put an instance that is in the InService state into the Standby state, update or troubleshoot the instance, and then return the instance to service. Instances that are on standby are still part of the Auto Scaling group, but they do not actively handle application traffic. For more information on the standby state please refer to the below link: * <http://docs.aws.amazon.com/autoscaling/latest/userguide/as-enter-exit-standby.html>

NEW QUESTION: 4 You are the Office 365 administrator for your company. Users report that they have received significantly more spam messages over the past month than they normally receive. You need to analyze trends for the email messages received over the past 60 days. From the Office 365 admin center, what should you view?
A. The Office 365 Malware detections in sent mail report
B. The Mailbox content search and hold report
C. Messages on the Service health page
D. The Received mail report
Answer: D
Explanation: Explanation/Reference: Explanation: An Office 365 administrator can use the Mail Protection Reports in Office 365 to view data about malware, spam, and rule detections for up to the last 90 days. The reports can be viewed as a graph to display trends for email messages over a period of time; in this question, for the last 60 days. The graph view will tell you if the amount of good mail, malware and spam detected has increased or decreased over the time period of the report. The Received Mail report shows the received mail grouped by traffic type: Good mail - messages that were received and not identified as spam or malware. Spam - messages identified as spam. Malware - messages that contained malware. Transport rules - messages that matched at least one rule.
