After you purchase OGEA-101 exam materials, we will provide you with one year free update, Even if you just entered the industry, you can easily understand their meaning.

The most attractive features delivered by Estruturit in OGEA-101 Dumps PDF File are as below : Well-constructed OGEA-101 Questions Answers with reliable OGEA-101 PDF.

You could also contact us to confirm TOGAF Enterprise Architecture Part 1 Exam exam training [C_THR12_2311 Trusted Exam Resource](#) about the update, Experts proficient in this area, We will offer you the most excellent pre-sales and after-sales service.

We always stand behind our customers and put the customers' interest in the first place, Here, we would like to recommend ITCertKey's OGEA-101 exam materials to you.

100% Pass The Open Group - Trustable OGEA-101 - TOGAF Enterprise Architecture Part 1 Exam Exam Topics Pdf

(If you do not receive the OGEA-101 practice dumps within 12 hours, please contact us, The free updates of the product will be valid for three months after the purchase of the product.

With the OGEA-101 test guide use feedback, it has 98%-100% pass rate, It will be ok, But the attitude and aims towards the exam test are changed as time goes on.

Above all, your doubts must be wiped out, It will be a magical experience, **Exam Topics OGEA-101 Pdf** On struggling way to your dreams you may meet with some matters and problems knock you down, but your situation can be changed completely now.

After you bought the practice materials for the OGEA-101 exam, if you have any question in the process of using, you can ask the service staff for help by email.

NEW QUESTION: 1 Refer to the exhibit. This multilayer Cisco Nexus switch had been the active virtual gateway for Group 1 before it became temporarily unavailable. What will happen to GLBP Group 1 when this device becomes available again? **A.** The currently active router remains active. **B.** It depends on the priority value that is configured active on the router. **C.** It depends on the weighting values that are configured active on the router. **D.** The Cisco Nexus switch becomes the active virtual gateway after 600 seconds. **Answer: A**
Explanation: Explanation GLBP prioritizes gateways to elect an active virtual gateway (AVG). If multiple gateways have the same priority, the gateway with the highest real IP address becomes the AVG. The AVG assigns a virtual MAC address to each member of the GLBP group. Each member is the active virtual forwarder (AVF) for its assigned virtual MAC address, forwarding packets sent to its assigned virtual MAC address. The AVG also answers Address Resolution Protocol (ARP) requests for the virtual IP address. Load sharing is achieved when the AVG replies to the ARP requests with different virtual MAC addresses. Note: Packets received on a routed port destined for the GLBP virtual IP address terminate on the local router, regardless of whether that router is the active GLBP router or a redundant GLBP router. This termination includes ping and Telnet traffic. Packets received on a Layer 2 (VLAN) interface destined for the GLBP virtual IP address terminate on the active router.

NEW QUESTION: 2 A company owns four kiosks that are in close proximity within a shopping center. The owner is concerned about someone accessing the internet via the kiosk's wireless network. Which of the following should be implemented to provide wireless access only to the employees working at the kiosk? **A.** Firewall **B.** Web filtering **C.** MAC filtering **D.** Host-based antivirus **Answer: C**

NEW QUESTION: 3 A manufacturer uses improved linkage between order entry, production, and shipping to reduce raw materials and work-in-process inventory. Which type of fraud will these changes likely reduce? **A.** Theft of resources from inventory. **B.** Payment of fraudulent invoices. **C.** False reporting of hours worked. **D.** Purchases from a related party. **Answer: A**

NEW QUESTION: 4 기본 프라이빗 IP 주소가 할당된 퍼블릭 서브넷에서 Amazon Elastic Compute Cloud (EC2) 인스턴스를 시작했으며 인터넷 게이트웨이가 VPC에 연결되어 있고 퍼블릭 라우팅 테이블이 모든 인터넷 기반 인터넷을 전송하도록 구성되었습니다. 이 인스턴스에서 인터넷에 연결할 수 없는 이유는 무엇입니까? **A.** 인터넷 게이트웨이 보안 그룹은 모든 아웃 바운드 트래픽을 허용해야 합니다. **B.** 인스턴스 "소스 / 대상 확인" 특성이 사용 가능해야 합니다. **C.** 인스턴스에 퍼블릭 IP 주소가 없습니다. **D.** 인스턴스 보안 그룹은 모든 인바운드 트래픽을 허용해야 합니다. **Answer: C**
