NEW QUESTION: 1 QUESTION NO: 29 SIMULATION Overview The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design. Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task. Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. To start the lab You may start the lab by clicking the Next button. You plan to back up all the Azure virtual machines in your Azure subscription at 02:00 Coordinated Universal Time (UTC) daily. You need to prepare the Azure environment to ensure that any new virtual machines can be configured quickly for backup. The solution must ensure that all the daily backups performed at 02:00 UTC are stored for only 90 days. What should you do from the Azure portal? **Answer:** Explanation: See explanation below. Explanation Task A: Create a Recovery Services vault (if a vault already exists skip this task, go to Task B below) A1. From Azure Portal, On the Hub menu, click All services and in the list of resources, type Recovery Services and click Recovery Services vaults. If there are recovery services vaults in the subscription, the vaults are listed. A2. On the Recovery Services vaults menu, click Add. A3. The Recovery Services vault blade opens, prompting you to provide a Name, Subscription, Resource group, and Location Task B. B1. On the Recovery Services vault blade (for the vault you just created), in the Getting Started section, click Backup, then on the Getting Started with Backup blade, select Backup goal. The Backup Goal blade opens. If the Recovery Services vault has been previously configured, then the Backup Goal blades opens when you click Backup on the Recovery Services vault blade. B2. From the Where is your workload running? drop-down menu, select Azure. B3. From the What do you want to backup? menu, select Virtual Machine, and click OK. B4. Finish the Wizard. Task C. create a backup schedule C1. Open the Microsoft Azure Backup agent. You can find it by searching your machine for Microsoft Azure Backup. C2. In the Backup agent's Actions pane, click Schedule Backup to launch the Schedule Backup Wizard. C3. On the Getting started page of the Schedule

Backup Wizard, click Next.C4. On the Select Items to Backup page, click Add Items.The Select Items dialog opens.C5. Select Blob Storage you want to protect, and then click OK.C6.In the Select Items to Backup page, click Next.On the Specify Backup Schedule page, specifySchedule a backup every: dayAt the following times: 2.00 AMC7. On the Select Retention Policy page, set it to 90 days, and click Next.C8. Finish the Wizard.References:
