NEW QUESTION: 1 What is one of the prerequisites that is required to be able to use the Load Impact tool to support automated testing?
A. The application to be tested must be deployed onto a physical server behind a firewall.
B. The application to be tested must be deployed behind a firewall
C. The application to be tested must be deployed on a secure customer environment.
D. The application to be tested must be accessible over the internet
Answer: A

NEW QUESTION: 2 Which two statements about IS-IS are true? (Choose two.)
A. The default hello interval is 10 seconds and the default hold timer is 30 seconds.
B. The hello interval can be changed on a per-interface basis with the command isis hello-multiplier.
C. Both IS-IS routers need to have the same capabilities in the hello packet in order to form neighbors.
D. Both routers need to have the same hello intervals and hold timers in order to form IS-IS neighbors.
Answer: A, B
Explanation: Explanation/Reference: Explanation: To specify the length of time between hello packets that the Cisco IOS software sends, use the isis hello-interval command in interface configuration mode. By default, a value three times the hello interval seconds is advertised as the hold time in the hello packets sent. (Change the multiplier of 3 by specifying the isis hello-multiplier command.) With smaller hello intervals, topological changes are detected faster, but there is more routing traffic. The default is 10 seconds. Reference: http://www.cisco.com/c/en/us/td/docs/ios/12_2/iproute/command/reference/fiprrp_r/1rfisis.html

NEW QUESTION: 3 Which set of competencies should a project manager have?
A. Technical project management, expertise in every role, and PMP certification
B. Expertise in every detail on project activities, PMP certification, and leadership
C. Expertise in the industry, leadership and business management, and bilingual skills
D. Leadership, strategic and business management, and technical project management
Answer: D
