NEW QUESTION: 1You are using a decision tree algorithm. You have trained a model that generalizes well at a tree depth equal to 10. You need to select the bias and variance properties of the model with varying tree depth values. Which properties should you select for each tree depth? To answer, select the appropriate options in the answer area.**Answer:** Explanation: Explanation: In decision trees, the depth of the tree determines the variance. A complicated decision tree (e.g. deep) has low bias and high variance. Note: In statistics and machine learning, the bias-variance tradeoff is the property of a set of predictive models whereby models with a lower bias in parameter estimation have a higher variance of the parameter estimates across samples, and vice versa. Increasing the bias will decrease the variance. Increasing the variance will decrease the bias. References: <https://machinelearningmastery.com/gentle-introduction-to-the-bias-variance-trade-off-in-machine-learning/>

NEW QUESTION: 2Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series. Your network contains an Active Directory domain named contoso.com. The functional level of the domain is Windows Server 2012. The network uses an address space of 192.168.0.0/16 and contains multiple subnets. The network is not connected to the Internet. The domain contains three servers configured as shown in the following table. Client computers obtain TCP/IP settings from Server3. You add a second network adapter to Server2. You connect the new network adapter to the Internet. You install the Routing role service on Server2. Server1 has four DNS zones configured as shown in the following table. You need to create a zone to ensure that Server1 can resolve single-label names. What should you name the zone on Server1?**A.** . (root)**B.** GlobalNames**C.** WINS**D.** NetBIOS**Answer: B**Explanation:

Explanation[https://technet.microsoft.com/en-us/library/cc816610\(v=ws.10\).aspx](https://technet.microsoft.com/en-us/library/cc816610(v=ws.10).aspx)

NEW QUESTION: 3

委任された承認者は、以前に承認されたプロセスを取り消すことができますか？**A.** はい**B.** いいえ、リクエストが承認されると、管理者のみが承認プロセスを取り消すことができます

Answer: A
