NEW QUESTION: 2You are designing an Azure web app that will use Azure Active Directory (Azure AD) for authentication.You need to recommend a solution to provide users from multiple Azure AD tenants with access to App1. The solution must ensure that the users use Azure Multi-Factor Authentication (MFA) when they connect to App1.Which two types of objects should you include in the recommendation? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point**A.** Azure AD guest accounts**B.** a Microsoft intune app protection policy**C.** an Azure application security group**D.** Azure AD conditional access policies**E.** an identity Experience Framework policy**F.** Azure AD managed identities**Answer: B,C**

NEW QUESTION: 3You are a desktop support engineer for an advertising company that uses Windows 8.1 workstations.An employee who manages video content for the company website recently lost important video files due to a single-drive failure on a Windows 8.1 workstation. You need to prevent a single-drive failure from occurring again on this employee's workstation, which only has a capacity for three physical hard drives. Additionally, the employee requires optimal performance when manipulating and streaming video files.Which Storage Space solution should you implement?**A.** parity spaces**B.** two-way mirror**C.** simple spaces**D.** three-way mirror**Answer: A****Explanation:**Parity spaces (also known as RAID-5) are designed for storage efficiency and protect your files from drive failure by keeping more than one copy. Parity spaces are best for archival data and streaming media, like music and videos. This storage layout requires at least three drives to protect you from a single drive failure and at least seven drives to protect you from two drive failures.Reference: Storage Spaces: FAQ <http://windows.microsoft.com/en-us/windows-8/storage-spaces-pools>

NEW QUESTION: 4How does HPE OneView 4.0 along with HPE ProLiant Gen 10 benefit customers who are concerned about malware attacks?**A.** Provides a Secure Boot option setting as part of the server profile.**B.** Forces secure boot for both Legacy and UEFI BIOS mode.**C.** Introduces Trusted Platform Module 2.0 support.**D.** Continuously scans server firmware for malware code.**Answer: B**
