NEW QUESTION: 3 Which three statements are true regarding plan cycles? (Choose three.)
A. You cannot display a target amount or custom score from a previous plan cycle in the current plan cycle.
B. You can display a target amount or custom score from a previous plan cycle in the current plan cycle.
C. You can reference a plan within itself to display values from a previous plan cycle in a subsequent cycle.
D. All active plans are available to be cross-referenced, even plans with no started cycles.
E. Active plans are available to be cross-referenced, except plans with no started cycles.
Answer: B,C,D
Explanation: Explanation/Reference: Explanation: All active plans are available to be cross referenced, even plans with no started cycles. You can also reference a plan within itself to display values from a previous plan cycle in a subsequent cycle. For example, you can display a target amount or custom score from a previous plan cycle in the current plan cycle so that managers are aware of that data when making a current compensation decision. You cannot select a default value for a column by cross-referencing a column from another plan if you have selected values for the Default Value, Default and Override Formula, or Compensation Derived Factor fields on the Configure Column Properties dialog box.
