You are hired to replace the company's existing ASP.NET website at <http://www.contoso.com> with a new SharePoint 2013 public-facing website. The site will display data about the company and information about residential properties that the individual agents in the company are selling. You have SharePoint Server environments for development, staging, and production. Search The website has the following requirements: Site visitors must be able to search for documents that are located anywhere on the site. When site visitors search for real estate properties, they must see information about a property. When a visitor searches for the word Guidelines, a PDF document named Real Estate Guidelines must appear at the top of the search results. Search Engine Optimization The company wants to ensure that the website displays prominently in Internet search results when people search for real estate. The website has the following requirements: Internet search engines must properly rank pages so that the more popular pages on the site appear first in the Internet search engine results. SharePoint must generate the sitemap.xml and robots.txt files that are used by Internet search engines. When an Internet

search engine crawls the site, the search engine must recognize that the following URLs display information about different agents:

<http://www.contoso.com/FindAnAgent?agentName=JohnDoe&officeId = Sacramento>

<http://www.contoso.com/FindAnAgent?agentName=JohnDoe&officeId = Houston>The search engine must recognize that the following URLs display the same information about the same agent:

<http://www.contoso.com/FindAnAgent?agentName=JohnDoe&officeId=Sacramento>

<http://www.contoso.com/FindAnAgent?agentName=JohnDoe&officeId = Sacramento&icerts=true>

A page within the site collection must display a list of all the board members.  
The website must be located at <http://www.contoso.com/sites/board>.  
**Internet Site Collection**Anonymous access is enabled on the Internet site collection. The Internet site collection has the following requirements:  
The site collection must include a sub-site named Offices.  
The URL of the Offices sub-site is <http://www.contoso.com/Offices>.  
Each office must have its own page on the site.  
The pages for each office must have the same style and structure.  
Each office page must contain a Content Search Web Part that displays a listing of all the properties that are being sold by agents in the office.  
The Content Search Web Part must use a custom display template named `Real Estate Property` to render search results when site visitors search for a property.  
The target page for terms in the Office term set must point to a page named `Office.aspx` that is in the `Pages` library of the Offices sub-site.  
The site must contain an About Us section that contains a Content Search Web Part that lists the members of the board of directors for the company.  
Each member of the board must have a page that contains biographical information about that board member.  
The list of board members must be available in the Board Member site collection.  
Site visitors must be able to view information about individual agents, including their contact information, certifications, and picture.  
When agents visit the Internet site collection, the agents may add information about each of the real estate properties that they are selling.  
The agents must be able to tag real estate properties according to their features.  
Real estate agents must enter real estate property information into a web form that is used specifically for data collection.  
The web form must collect the following

information: The property address. Up to five pictures of the property. The selling price. The number of bedrooms and bathrooms. The name of the real estate agent. Tags that will further describe the property. Agent Site Collection The Agent site collection is in the same web application and is accessible only to agents. The Agent site collection has the following requirements: The site collection must include a site that contains instructions for real estate agents that tells them how to add property information to the website. The website must be located at <http://www.contoso.com/sites/agents>. A Web Part must use the .NET client-side object model (CSOM) to retrieve all of the terms from only the Features term set. Page Layouts and Web Parts Page Layouts You must create the following page layouts: About Us, Biography With Image, Biography No Image, and Office. The page layouts have the following requirements: The About Us page layout must include a field to which the user may add Web Parts. The Biography With Image and Biography No Image page layouts must display biographical information about the board of directors. You must create a content type named Biography. Biography With Image and Biography No Image page layouts must use the Biography content type.
