**NEW QUESTION: 1** 조직이 AWS에서 웹 사이트를 설정하고 있습니다. 조직은 AWS EC2 인스턴스에서 수행  
될 다양한 보안 조치를 수행하고 있습니다. 아래에 언급된 보안 메커니즘 중 어떤 것이 향후 데이터 유출을  
방지하고 보안 취약점을 식별하는 데 도움이되지 않습니까?**A.** 메모리 누수가 있는지 코드 검사를  
수행하십시오.**B.** Amazon의 사전 승인을 받아 AWS에서 침투 테스트를 실행하십시오.**C.** 응용 프로그램  
테스트를 위해 SQL 주입을 수행하십시오.**D.** AWS 인스턴스에서 강화 테스트를 수행하십시오.**Answer: A**  
Explanation: 설명: AWS 보안은 사용자가 Amazon만큼 책임이 있는 공유 보안 모델을 따릅니다. 아마존은  
퍼블릭 클라우드이므로 해커가 대상으로 해야 합니다. 조직이 AWS EC2에서 애플리케이션을 호스팅 할  
계획이라면 아래에 언급된 보안 검사를 수행하여 보안 취약점 / 데이터 유출을 찾아야 합니다. 공격자가 수행  
한 침투 테스트를 수행하여 취약점을 찾으십시오. 침투 테스트를 수행하기 전에 조직은 AWS의 승인을  
받아야 합니다. 불필요한 포트가 열려 있는지 확인하기 위해 강화 테스트를 수행하십시오. DB 보안 문제를 찾기  
위해 SQL 주입을 수행하십시오. 코드 메모리 검사는 일반적으로 조직이 애플리케이션 성능을 향상 시키려고  
할 때 유용합니다. <http://aws.amazon.com/security/penetration-testing/>

**NEW QUESTION: 2** Which two statements about VPLS are true? (Choose two.)**A.** There is a  
partial mesh of pseudo wires.**B.** Only L2TPv3 can be used for pseudo wire establishment.**C.**  
There is a full mesh of pseudo wires.**D.** There is split-horizon to avoid loops.**Answer: C,D**  
Explanation: Topic 6, I&O&T Managed Services Traversing the Core

### **NEW QUESTION: 3**

AzureAD 사용자アカウントを作成するRunbookを展開することを計画しています。  
RunbookがAzureActiveDirectory用のAzurePowerShellコマンドレットを実行できることを確認す  
る必要があります。このタスクを完了するには、MicrosoftAzureポータルにサインインします。  
**Answer:** Explanation: See solution below. Explanation Azure Automation now ships with the  
Azure PowerShell module of version 0.8.6, which introduced the ability to non-interactively  
authenticate to Azure using OrgId (Azure Active Directory user) credential-based  
authentication. Using the steps below, you can set up Azure Automation to talk to Azure using  
this authentication type. Step 1: Find the Azure Active Directory associated with the Azure  
subscription to manage: 1. Log in to the Azure portal as the service administrator for the Azure  
subscription you want to manage using Azure Automation. You can find this user by logging in  
to the Azure portal as any user with access to this Azure subscription, then clicking Settings,  
then Administrators. 2. Note the name of the directory associated with the Azure subscription  
you want to manage. You can find this directory by clicking Settings, then Subscriptions. Step 2:  
Create an Azure Active Directory user in the directory associated with the Azure subscription to  
manage: You can skip this step if you already have an Azure Active Directory user in this  
directory. and plan to use this OrgId to manage Azure. 1. In the Azure portal click on Active  
Directory service. 2. Click the directory name that is associated with this Azure subscription. 3.  
Click on the Users tab and then click the Add User button. 4. For type of user, select "New user in  
your organization." Enter a username for the user to create. 5. Fill out the user's profile. For role,  
pick "User." Don't enable multi-factor authentication. Multi-factor accounts cannot be used  
with Azure Automation. 6. Click Create. 7. Jot down the full username (including part after @  
symbol) and temporary password. Step 3: Allow this Azure Active Directory user to manage this  
Azure subscription. 1. Click on Settings (bottom Azure tab under StorSimple) 2. Click  
Administrators 3. Click the Add button. Type the full user name (including part after @ symbol)  
of the Azure Active Directory user you want to set up to manage Azure. For subscriptions,  
choose the Azure subscriptions you want this user to be able to manage. Click the check mark.

Step 4: Configure Azure Automation to use this Azure Active Directory user to manage this Azure subscription Create an Azure Automation credential asset containing the username and password of the Azure Active Directory user that you have just created. You can create a credential asset in Azure Automation by clicking into an Automation Account and then clicking the Assets tab, then the Add Setting button. Note: Once you have set up the Azure Active Directory credential in Azure and Azure Automation, you can now manage Azure from Azure Automation runbooks using this credential.
