NEW QUESTION: 2 DRAG DROP Case Study This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided. To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other question on this case study. At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next sections of the exam. After you begin a new section, you cannot return to this section. To start the case study To display the first question on this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question. Overview Contoso, Ltd. is an international manufacturing company that has 30,000 users. Contoso has the following departments: sales, research, marketing, human resources, executive, manufacturing, and legal. The sales department has 2,000 users. All of the users in the sales department are located in the United States. The research department has 3,000 users. All of the users in the research department are located in Europe. Physical Locations Contoso has two main offices. The offices are located in Houston and Frankfurt. Each office has 15,000 users. The offices connect to each other by using an MPLS network. Each office connects directly to the Internet. Existing Environment Lync Server Infrastructure Contoso has a Lync Server 2013 infrastructure that only uses internal instant messaging (IM) and presence. The infrastructure contains a single Enterprise Edition Front End pool that services all of the users. Contoso uses a SIP domain of contoso.com for all of the users. Client computers have either Microsoft Lync 2010 or Microsoft Lync 2013 installed. Before deploying Skype for Business Server 2015 and migrating the users, you implement a small pilot project to test the functionality of Skype for Business Server 2015. Problem Statements The users in the pilot report that occasionally they cannot sign in to Skype for Business 2015. Requirements Business Goal Contoso plans to upgrade to Skype for Business Server 2015 during the next six months. Contoso must deploy all of the conferencing and edge services. Contoso must also configure federation with its parent company, which is named Proseware, Inc. Proseware is located in Europe and has a Lync Server 2010 infrastructure. Contoso must minimize hardware and software purchasing costs, while guaranteeing performance levels for all Skype for Business Server 2015 workloads. Planned Changes Contoso plans to implement the following workloads in the Skype for Business Server 2015 deployment: Federation Dial-in conferencing External user access Audio, video, and web conferencing The ability to host Lync meetings that have external participants The FQDNs of the edge services will be configured as shown in the following table. Technical Requirements Contoso identifies the following technical requirements for the planned deployment: Only federation to Proseware must be allowed. All of the edge services must use default ports. Wide area network (WAN) traffic and Internet traffic must be minimized. All of the user contacts stored in Skype for Business Server 2015 must be backed up. The sales

department must have a dedicated dial-in conferencing number. All other users in both the United States and Europe must use a pool of regional dial-in conferencing numbers. If a single component fails, all Skype for Business services must remain available without the need for manual intervention. Performance degradation is acceptable during a component failure state. The conversations of all the sales department users must be archived for 30 days. The conversations of all the research department users must be archived for 90 days. No other conversations must be archived. After the migration to Skype for Business Server 2015, all client computers will have three months to upgrade to Skype for Business. After three months, legacy clients must be blocked from accessing the Skype for Business Server 2015 infrastructure. Security Requirements Contoso identifies the following security requirements for the planned deployment: All Skype for Business Server conferences must use a unique URL. Each Internet-facing service must have one or more dedicated public IP addresses. Only the users in the human resources department must be prevented from connecting to Skype for Business Server 2015 remotely. You need to identify the cause of the authentication issue for the pilot users. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. Select and Place: **Answer:** Explanation:

NEW QUESTION: 3 The Agile Controller fails to connect to the AD server during the configuration of the Agile Controller.
