## Associate - SAP SuccessFactors Career Development Planning and Mentoring 2H/2023 Trainingsunterlagen

Ich rückte vom Tisch ab, war dem sand mitführenden Wind und den übertriebenen **C-THR95-2311 Fragenkatalog** Geräuschen der Flut, des alten Kraftmeiers, ausgeliefert, an sich mir seyn mögen, so sehe ich doch nicht mit Sicherheit vorher, daß ich sie, bis ich wieder Geld bekomme Ich hatte den Brief so weit geschrieben, [1z0-1075-24 Lerntipps](#) als mir eine unerwartete Schuld einging, die jenes deficit\_ ersetzt und mich in den Stand setzt, Deinem Begehren selbst zu willfahren.

Ich wollte mich nicht so sehen aber machte ich mir da vielleicht **C-THR95-2311 Fragenkatalog** nur etwas vor, Sie ließ den Arm um meine Schulter liegen, doch ihr Kopf sank zurück in das Polster.

Da er sich ferner standhaft weigerte, dies zu tun, wurde **C-THR95-2311 Fragenkatalog** sie zornig und verließ ihn, Auch durften die Brüder Rennwand nicht als Meßdiener vom Sprungbrett in den Himmel hinabspringen; das hätte Luzie, ihr Schwesterchen, C-THR95-2311 Pruefungssimulationen das in fadenscheiniger Kriegswolle auf der Zeugenbank saß und den Sprungsport förderte, niemals geduldet.

**NEW QUESTION: 1**A network technician installs Windows Server 2012 Standard on a server named Server1.A corporate policy states that all servers must run Windows Server 2012 Enterprise.You need to ensure that Server1 complies with the corporate policy.You want to achieve this goal by using the minimum amount of administrative effort.What should you perform?**A.** offline servicing by using Dism**B.** online servicing by using Dism**C.** a clean installation of Windows Server 2012**D.** an upgrade installation of Windows Server 2012**Answer: B**  
Explanation:Explanation/Reference:Explanation:A. Not least effortB. Not least effortC. dism /online /set-editionD. offline would be less ideal and more workex: DISM /online /Set-Edition:ServerEnterprise / ProductKey:489J6-VHDMP-X63PK-3K798-CPX3YWindows Server 2008 R2/2012 contains a command- line utility called DISM (Deployment Image Servicing and Management tool). This tool has many features, but one of those features is the ability to upgrade the edition of Windows in use. Note that this process is for upgrades only and is irreversible.You cannot set a Windows image to a lower edition. The lowest edition will not appear when you run the / Get-TargetEditions option.If the server is running an evaluation version of Windows Server 2012 R2 Standard or Windows Server2012 R2Datacenter, you can convert it to a retail version as follows:If the server is a domain controller, you cannot convert it to a retail version. In this case, install an additional domain controller on a server that runs a retail version and remove AD DS from the domain controller that runs on the evaluation version.From an elevated command prompt, determine the current edition name with the command DISM /online / Get-CurrentEdition. Make note of the edition ID, an abbreviated form of the edition name.Then run DISM /online /Set-Edition:<edition ID> /ProductKey:XXXXXXXXXX-XXXXX-XXXXX-XXXXX /AcceptEula,providing the edition ID and a retail product key.The server will restart twice.References:<http://technet.microsoft.com/en-us/library/jj574204.aspx>

### Topic 3, City Power & Light Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided. To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study. At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section. To start the case study To display the first question in this case study, click the button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Background

#### City Power & Light company provides electrical infrastructure monitoring solutions for homes and businesses. The company is migrating solutions to Azure.

#### Current environment

#### Architecture overview

The company has a public website located at <http://www.cpandl.com/>. The site is a single-page web application that runs in Azure App Service on Linux. The website uses files stored in Azure Storage and cached in Azure Content Delivery Network (CDN) to serve static content. API Management and Azure Function App functions are used to process and store data in Azure Database for PostgreSQL. API Management is used to broker communications to the Azure Function app functions for Logic app integration. Logic apps are used to orchestrate the data processing while Service Bus and Event Grid handle messaging and events. The solution uses Application Insights, Azure Monitor, and Azure Key Vault.

#### Architecture diagram

The company has several applications and services that support their business. The company plans to implement serverless computing where possible. The overall architecture is shown below.

#### User authentication

The following steps detail the user authentication process:

- \* The user selects Sign in in the website.
- \* The browser redirects the user to the Azure Active Directory (Azure AD) sign in page.
- \* The user signs in.
- \* Azure AD redirects the user's session back to the web application. The URL includes an access token.
- \* The web application calls an API and includes the access token in the authentication header. The application ID is sent as the audience ('aud') claim in the access token.
- \* The back-end API validates the access token.

#### Requirements

Corporate website

- \* Communications and content must be secured by using SSL.
- \* Communications must use HTTPS.
- \* Data must be replicated to a secondary region and three availability zones.
- \* Data storage costs must be minimized.

#### Azure Database for PostgreSQL

The database connection string is stored in Azure Key Vault with the following attributes:

- \* Azure Key Vault name: cpandlkeyvault
- \* Secret name: PostgreSQLConn
- \* Id: 80df3e46ffcd4f1cb187f79905e9a1e8

The connection information is updated frequently. The application must always use the latest information to connect to the database.

#### Azure Service Bus and Azure Event Grid

- \* Azure Event Grid must use Azure Service Bus for queue-based load leveling.
- \* Events in Azure Event Grid must be routed directly to Service Bus queues for use in buffering.
- \* Events from Azure Service Bus and other Azure services must continue to be routed to Azure Event Grid for processing.

#### Security

- \* All SSL certificates and credentials must be stored in Azure Key Vault.
- \* File access must restrict access by IP, protocol, and Azure AD rights.
- \* All user accounts and processes must receive only those privileges which

are essential to perform their intended function. Compliance Auditing of the file updates and transfers must be enabled to comply with General Data Protection Regulation (GDPR). The file updates must be read-only, stored in the order in which they occurred, include only create, update, delete, and copy operations, and be retained for compliance reasons. Issues Corporate website While testing the site, the following error message displays: CryptographicException: The system cannot find the file specified. Function app You perform local testing for the RequestUserApproval function. The following error message displays: 'Timeout value of 00:10:00 exceeded by function: RequestUserApproval' The same error message displays when you test the function in an Azure development environment when you run the following Kusto query: FunctionAppLogs | where FunctionName == "RequestUserApproval" Logic app You test the Logic app in a development environment. The following error message displays: '400 Bad Request' Troubleshooting of the error shows an HttpTrigger action to call the RequestUserApproval function. Code Corporate website Security.cs: Function app RequestUserApproval.cs:

**NEW QUESTION: 3** An administrator views the Indexing subtasks and notices a 'Change Location' subtask with the status 'Waiting'. Which step must complete for the subtask to continue processing?  
**A.** Task restart  
**B.** Enterprise Vault server backup  
**C.** SQL database backup  
**D.** Copy acknowledgement  
**Answer: D**

**NEW QUESTION: 4** Universal Containers is deploying a formal sales methodology while implementing Salesforce. What should a consultant recommend to ensure the alignment of the sales methodology and Salesforce? Choose 3 answers  
**A.** Override Salesforce user interface with the sales methodology user interface.  
**B.** Develop a data integration between Salesforce and the sales methodology db.  
**C.** Embed custom components within Salesforce to support the sales methodology.  
**D.** Consider available sales methodology AppExchange applications.  
**E.** Configure Salesforce standard and custom objects to support the sales methodology.  
**Answer: C,D,E**
