It is necessary to bear in mind that in Switzerland dusk Certified-Business-Analyst Deutsch first settles in the valleys and then gradually creeps up to the villages situated on a higher level.

NEW QUESTION: 1 Conflict had existed between Spain and England since the 1570s. England wanted a share of the wealth that Spain had been taking from the lands it had claimed in the Americas. Elizabeth I, Queen of England, encouraged her staunch admiral of the navy, Sir Francis Drake, to raid Spanish ships and towns. Though these raids were on a small scale, Drake achieved dramatic success, adding gold and silver to England's treasury and diminishing Spain's omnipotence. Religious differences also caused conflict between the two countries. Whereas Spain was Roman Catholic, most of England had become Protestant. King Philip II of Spain wanted to claim the throne and make England a Catholic country again. To satisfy his ambition and also to retaliate against England's theft of his gold and silver, King Philip began to build his fleet of warships, the Armada, in January 1586. Philip intended his fleet to be indestructible. In addition to building new warships, he marshaled one hundred and thirty sailing vessels of all types and recruited more than nineteen thousand robust soldiers and eight thousand sailors. Although some of his ships lacked guns and others lacked ammunition, Philip was convinced that his Armada could withstand any battle with England. The martial Armada set sail from Lisbon, Portugal, on May 9, 1588, but bad weather forced it back to port. The voyage resumed on July 22 after the weather became more stable. The Spanish fleet met the smaller, faster, and more maneuverable English ships in battle off the coast of Plymouth, England, first on July 31 and again on August 2. The two battles left Spain vulnerable, having lost several ships and with its ammunition depleted. On August 7, while the Armada lay at anchor on the French side of the Strait of Dover, England sent eight burning ships into the midst of the Spanish fleet to set it on fire. Blocked on one side, the Spanish ships could only drift away, their crews in panic and disorder. Before the Armada could regroup, the English attacked again on August 8. Although the Spaniards made a valiant effort to fight back, the fleet suffered extensive damage. During the eight hours of battle, the Armada drifted perilously close to the rocky coastline. At the moment when it seemed that the Spanish ships would be driven onto the English shore, the wind shifted, and the Armada drifted out into the North Sea. The Spaniards recognized the superiority of the English fleet and returned home, defeated. The Armada was ___ on one side. **A.** answer not available in this article **B.** closed off **C.** damaged **D.** alone **E.** circled **Answer: B** Explanation: Explanation/Reference: Explanation:

NEW QUESTION: 2 Which three Cisco IOS commands are required to configure a voice gateway as a DHCP server to support a data subnet with the IP address of 10.1.30.0/24 and a default gateway of 10.1.30.1/24? (Choose three.) **A.** network 10.1.30.1/24 **B.** default-gw 10.1.30.1/24 **C.** ip dhcp pool **D.** network 10.1.30.0 255.255.255.0 **E.** default-router 10.1.30.1 **F.** ip dhcp pool data **G.**

subnet 10.1.30.1 255.255.255.0
Answer: D,E,F
Explanation:1) To configure the DHCP address pool name and enter DHCP pool configuration mode, use the following command in global configuration mode.
E.Router(config)# ip dhcp pool name - Creates a name for the DHCP Server address pool and places you in DHCP pool configuration mode
2) To configure a subnet and mask for the newly created DHCP address pool, which contains the range of available IP addresses that the DHCP Server may assign to clients, use the following command in DHCP pool configuration mode.
E.Router(dhcp-config)# network network-number [mask | /prefix-length] - Specifies the subnet network number and mask of the DHCP address pool. The prefix length specifies the number of bits that comprise the address prefix. The prefix is an alternative way of specifying the network mask of the client. The prefix length must be preceded by a forward slash (/).
3) After a DHCP client has booted, the client begins sending packets to its default router. The IP address of the default router should be on the same subnet as the client. To specify a default router for a DHCP client, use the following command in DHCP pool configuration mode.
E.Router(dhcp-config)# default-router address [address2 ... address8] - Specifies the IP address of the default router for a DHCP client. One IP address is required; however, you can specify up to eight addresses in one command line.

NEW QUESTION: 3 You need to implement Windows Defender ATP to meet the security requirements. What should you do?
A. Configure port mirroring
B. Create the ForceDefenderPassiveMode registry setting
C. Download and install the Microsoft Monitoring Agent
D. Run WindowsDefenderATPOnboardingScript.cmd
Answer: C
Explanation/Reference: Testlet 3
Overview
Contoso, Ltd. is a consulting company that has a main office in Montreal and three branch offices in Seattle, and New York. The company has the offices shown in the following table. Contoso has IT, human resources (HR), legal, marketing, and finance departments. Contoso uses Microsoft 365. Existing Environment
Infrastructure
The network contains an Active Directory domain named contoso.com that is synced to a Microsoft Azure Active Directory (Azure AD) tenant. Password writeback is enabled. The domain contains servers that run Windows Server 2016. The domain contains laptops and desktop computers that run Windows 10 Enterprise. Each client computer has a single volume. Each office connects to the Internet by using a NAT device. The offices have the IP addresses shown in the following table. Named locations are defined in Azure AD as shown in the following table. From the Multi-Factor Authentication page, an address space of 198.35.3.0/24 is defined in the trusted IPs list. Azure Multi-Factor Authentication (MFA) is enabled for the users in the finance department. The tenant contains the users shown in the following table. The tenant contains the groups shown in the following table. Customer Lockbox is enabled in Microsoft 365. Microsoft Intune Configuration
The devices enrolled in Intune are configured as shown in the following table. The device compliance policies in Intune are configured as shown in the following table. The device compliance policies have the assignments shown in the following table. The Mark devices with no compliance policy assigned as setting is set to Compliant. Requirements
Technical Requirements
Contoso identifies the following technical requirements: Use the principle of least privilege. Enable User1 to assign the Reports reader role to users. Ensure that User6 approves Customer Lockbox requests as quickly as possible. Ensure that User9 can implement Azure AD Privileged Identity Management.
