Die Geschichte ist immer eine einseitige Berichterstattung, [PT0-003 Dumps Deutsch](#)  
Verschweig, was deine Geistlichkeit, an ihm Zu rächen, mir so nahe legen würde!

### NEW QUESTION: 1 Cisco

ISE分散展開に2つのノードとセカンダリノードが登録解除されるとどうなりますか？**A.** セカンダリノードが再起動します。**B.** プライマリノードが再起動します。**C.**

プライマリノードがスタンドアロンになります。**D.** 両方のノードが再起動します。**Answer: D**

Explanation: [https://www.cisco.com/c/en/us/td/docs/security/ise/1-1-1/installation\\_guide/ise\\_install\\_guide/ise\\_deploy.html](https://www.cisco.com/c/en/us/td/docs/security/ise/1-1-1/installation_guide/ise_install_guide/ise_deploy.html)

展開に2つのノードがあり、セカンダリノードの登録を解除すると、このプライマリとセカンダリのペアの両方のノードが再起動されます。

(以前のプライマリノードとセカンダリノードはスタンドアロンになります。)

### NEW QUESTION: 2 솔루션 아키텍트가 최근 구매한 애플리케이션의 스토리지 계층을 설계하고 있습니다.

애플리케이션은 Amazon EC2 인스턴스에서 실행되며 다음과 같은 계층 및 요구 사항이 있습니다. 데이터 계층 : 여러 시스템에서 공유되는 POSIX 파일 시스템. 서비스 계층 : 10 만 IOPS 이상의 블록 스토리지가 필요한 정적 파일 콘텐츠. 이러한 요구 사항을 충족하는 AWS 서비스 조합은 무엇입니까? (2 개 선택)**A.** 서비스 계층-Amazon EC2 Ephemeral Storage

<https://docs.aws.amazon.com/AWSEC2/latest/UserGuide/storage-optimized-instances.html>**B.**

데이터 계층-Amazon S3**C.** 데이터 계층-Amazon EFS**D.** 데이터 계층-Amazon EC2 Ephemeral Storage

**E.** 서비스 계층-프로비저닝 된 IOPS가 있는 Amazon EBS 볼륨**Answer: A,C**

### NEW QUESTION: 3 You need to prevent several users in the Miami office from establishing more than two concurrent Exchange ActiveSync connections to the Exchange Server organization.

The solution must affect only the users in the Miami office. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)**A.** Run the Set-ThrottlingPolicyAssociation cmdlet.

**B.** Create a new throttling policy that has the Organization scope.**C.** Create a new throttling policy that has the Global scope.**D.** Create a new throttling policy that has the Regular scope.**E.** Run the Set-ThrottlingPolicy cmdlet.**F.** Remove the default throttling policy.**Answer: A,D**

Explanation: New-ThrottlingPolicy Use the New-ThrottlingPolicy cmdlet to create a non-default user throttling policy. EXAMPLE 1 This example creates a non-default user throttling policy that can be associated with specific users. Any parameters that you omit inherit the values from the default throttling policy GlobalThrottlingPolicy\_<GUID>. After you create this policy, you must associate it with specific users. New-ThrottlingPolicy -Name ITUserPolicy -EwsMaxConcurrency 4 -ThrottlingPolicyScope Regular The ThrottlingPolicyScope parameter specifies the scope of the throttling policy. You can use the following values. Regular Specifies a custom policy that applies to specific users. Organization Specifies a custom policy that applies to all users in your organization. Global Reserved for the default throttling policy. Need to establish a New Throttling policy to limit the Exchange ActiveSync connections and that has a regular scope to associate with specific users. D Use the Set-ThrottlingPolicyAssociation cmdlet to associate a throttling policy with a specific object. The object can be a user with a mailbox, a user without a mailbox, a contact, or a computer account. EXAMPLE 1 This example associates a user with a user name of tonysmith to the throttling policy ITStaffPolicy that has higher limits. Set-ThrottlingPolicyAssociation -Identity tonysmith -ThrottlingPolicy ITStaffPolicy NOT A Need a regular scope NOT B Need a regular scope NOT E Need to associate the new throttling policy with respective users. Use the Set-ThrottlingPolicy cmdlet to modify the settings for a user throttling policy. EXAMPLE 1 This example modifies a throttling policy so that users associated with this policy can have a maximum of four concurrent requests running in Exchange Web Services. \$a = Get-ThrottlingPolicy RemoteSiteUserPolicy \$a | Set-ThrottlingPolicy -EwsMaxConcurrency 4 NOT F Need to create a new throttling policy Set-ThrottlingPolicyAssociation: Exchange 2013

EXAMPLE 1 This example creates a non-default user throttling policy that can be associated with specific users.
