NEW QUESTION: 3 You need to prevent several users in the Miami office from establishing more than two concurrent Exchange ActiveSync connections to the Exchange Server organization.

The solution must affect only the users in the Miami office. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.) **A.** Create a new throttling policy that has the Global scope. **B.** Create a new throttling policy that has the Regular scope. **C.** Create a new throttling policy that has the Organization scope. **D.** Run the Set-ThrottlingPolicy cmdlet. **E.** Remove the default throttling policy. **F.** Run the Set-ThrottlingPolicyAssociation cmdlet. **Answer: B,F**

Explanation: New-ThrottlingPolicy Use the New-ThrottlingPolicy cmdlet to create a non-default user throttling policy. EXAMPLE 1 This example creates a non-default user throttling policy that can be associated with specific users. Any parameters that you omit inherit the values from the default throttling policy GlobalThrottlingPolicy_<GUID>. After you create this policy, you must associate it with specific users. New-ThrottlingPolicy -Name ITUserPolicy -EwsMaxConcurrency 4 -ThrottlingPolicyScope Regular The ThrottlingPolicyScope parameter specifies the scope of the throttling policy. You can use the following values. Regular Specifies a custom policy that applies to specific users. Organization Specifies a custom policy that applies to all users in your organization. Global Reserved for the default throttling policy. Need to establish a New Throttling policy to limit the Exchange ActiveSync connections and that has a regular scope to associate with specific users. D Use the Set-ThrottlingPolicyAssociation cmdlet to associate a throttling policy with a specific object. The object can be a user with a mailbox, a user without a mailbox, a contact, or a computer account. EXAMPLE 1 This example associates a user with a user name of tonysmith to the throttling policy ITStaffPolicy that has higher limits. Set-ThrottlingPolicyAssociation -Identity tonysmith -ThrottlingPolicy ITStaffPolicy NOT A Need a regular scope NOT B Need a regular scope NOT E Need to associate the new throttling policy with respective users. Use the Set-ThrottlingPolicy cmdlet to modify the settings for a user throttling policy. EXAMPLE 1 This example modifies a throttling policy so that users associated with this policy can have a maximum of four concurrent requests running in Exchange Web Services. \$a = Get-ThrottlingPolicy RemoteSiteUserPolicy \$a | Set-ThrottlingPolicy -EwsMaxConcurrency 4
